PROFESSIONAL SUMMARY

Motivated software engineer looking to start a career in IT support. I have basic knowledge of hardware troubleshooting, operating system installation, Microsoft 365, and fundamental networking including Cisco switch concepts. While my professional background is in mobile and full-stack software development, I am eager to apply my problem-solving mindset, debugging experience, and ability to learn quickly to IT support and infrastructure roles. I am honest about being new to hands-on hardware work, but I am committed to growing through practical experience and continuous learning.

IT SUPPORT SKILLS & TECHNICAL COMPETENCIES

Hardware & Infrastructure Support (Basic)

Basic PC/laptop troubleshooting, printer & peripheral setup, understanding of hardware components, hardware refurbishment concepts, spare-parts inventory awareness. Open to deepening hands-on hardware skills.

Helpdesk & User Support

Basic understanding of end-user support, ticket handling, remote assistance tools, clear technical communication, and documentation for incident tracking.

Microsoft 365 & Cloud Services

Familiar with Microsoft 365 apps (Outlook, Teams, OneDrive), cloud collaboration basics, user account concepts, and hybrid learning support tools.

Operating Systems & Software Deployment

Basic Windows installation & configuration, OS update concepts, antivirus & security update awareness, software installation, driver setup, and command-line familiarity.

IT Asset & Lifecycle Management

Basic knowledge of hardware inventory tracking, asset assignment logs, preventive maintenance ideas, power-saving practices, and resource reuse concepts.

Networking & Cisco Switch Basics

Basic understanding of TCP/IP, DHCP/DNS, VLAN concepts, Cisco IOS CLI introduction, switch port configuration fundamentals, trunking awareness, and basic connectivity troubleshooting.

- Technical Troubleshooting
- System Maintenance (Basic)
- IT Documentation
- Incident Reporting
- Microsoft 365
- Cisco Switch Basics
- Git & GitHub
- Postman / API Testing
- VS Code / Android Studio
- Command Line

KEY IT SUPPORT RESPONSIBILITIES (LEARNING FOCUS)

Areas I am ready to learn and contribute in: Technical support & troubleshooting, hardware maintenance, IT asset management, system updates & OS deployment, IT helpdesk & user support, hardware refurbishment, preventive maintenance, IT infrastructure power management, scrap & spare-parts utilization, Microsoft 365 & cloud optimization, hybrid learning support, device management, digital process improvement, and daily IT operations reporting.

- Assist with diagnosis, repair, installation, and configuration of IT hardware and software under guidance.
- Help maintain logs of hardware states, user assignments, and service incidents.
- Support deployment of OS patches, antivirus updates, and institutional software.
- Learn and apply preventive maintenance routines and power-saving protocols.
- Support hybrid learning and remote collaboration tools for staff and students.

Software Engineering Background — Mobile & Full-Stack Development

PROFESSIONAL EXPERIENCE

Flutter Developer — Potential Inc

July 2024 – Present | Remote

Building and maintaining production Flutter, React Native, and full-stack applications across social, healthcare, IoT, commerce, and communication domains.

- Deployed multiple apps end-to-end to App Store and Google Play Store.
- Built real-time communication platforms using WebSocket, Socket.io, and Node.js backends.
- Integrated payment systems (Toss, RevenueCat), subscription management, deep linking, push notifications (FCM/APNS), and OTA updates (Shorebird).
- Established AI-assisted development workflows and CI/CD pipelines across projects.

Software Engineer (Contractual) — AKK Systems

May 2024 – August 2024 | Dhaka, Bangladesh

Built ERP system modules for multiple product-based companies in Bangladesh.

- Developed HRM and Tech modules for the EBS365 ERP system.
- Delivered MVC-patterned Flutter solutions for enterprise workflows.

Junior Software Engineer — Orangebd

August 2023 – March 2024 | Dhaka, Bangladesh

Built and shipped production Flutter applications including news platforms and school management systems.

- Developed **Kalbela Bangla News Paper** app with live streaming, story views, video playback, and e-paper.
- Built **Bangladesh Journal** news app with dynamic content loading.
- Created **EMASBD** school management system with attendance tracking and material distribution.

Software Engineer Apprentice — GrapView

January 2023 – July 2023 | Dhaka, Bangladesh

Developed Flutter apps for e-commerce and internal employee management.

- Built **GrapMart** e-commerce app and published it on Google Play Store.
- Developed **GrapView Attendance** app for employee check-in/out and attendance history.

NOTABLE PROJECTS

Hacamong

Parent-nanny platform with real-time booking, Toss payments, Apple/Kakao SSO, and live chat.

TOMO

Social media platform with group chat, events, likes/comments/shares, and real-time engagement.

Health Durumi

Healthcare/rehab platform with patient-coach tracking, WebView integration, and role-based access.

Nooly (Blink)

Full-stack real-time communication platform with admin dashboard, Docker deployment, and notifications.

CORE SOFTWARE ENGINEERING SKILLS

Mobile Development: Flutter, Dart, React Native, Firebase, REST APIs, WebSocket, BLoC/Cubit, GetX, Clean Architecture, MVC, GoRouter, local databases (sqflite, Hive, Realm).

Full-Stack & Tools: React, TypeScript, NestJS, Node.js, PostgreSQL, Redis, Docker, Git/GitHub, Postman, Figma, VS Code, Android Studio, Xcode, CI/CD pipelines.

Soft Skills: Problem-solving, analytical thinking, clear technical communication, cross-functional collaboration, documentation, and user empathy.

RECENT EDUCATION

BSc in Software Engineering

Daffodil International University | 2019 – 2023 | CGPA: 3.15 / 4.00

LANGUAGES

Bangla: Native | **English:** Comfortable (Excellent reading & writing)
